

1. **Obsolete HTML4 Doctype** instead of `<!DOCTYPE html>`.
2. **Deprecated Presentational Tags:** Uses `<center>`, `<font>`, and attributes like `bgcolor`, `text`, `border`, and `align` which should all be handled by CSS.
3. **Table Used for Page Layout:** Uses `<table>` tags to arrange the bio layout side-by-side rather than CSS Flexbox/Grid.
4. **Missing Accessibility Attributes:** The `<img>` tag is missing an alt description.
5. **Form Accessibility Issues:** Form inputs lack `<label for="...">` elements.
6. **Non-Semantic Navigation & Outline:** Uses manual spacers (`   `) and named anchors (`<a name="...">`) instead of `<nav>`, `<ul>`, `<section>`, and `<main>` landmarks.
